# ACIS Criminal/Infraction Statistical Extract

## Notice

This extract may contain records of criminal convictions that were expunged after the ending date of the extract. If the extract is used for other than statistical purposes, we strongly recommend that you update your information by using the CIPRS terminal located in the courthouse where the conviction upon which you are reporting was entered so that you do not report inaccurate information. In addition, NCAOC will not provide support for use and interpretation of any data received, except for the documentation provided.

## Overview

The Automated Criminal/Infractions System (ACIS) statistical extract contains criminal and infraction case information as recorded by the clerks of superior court in the 100 clerks' offices in North Carolina. The information is stored at the North Carolina Administrative Office of the Courts' (NCAOC) Data Center. This document describes the information contained in this extract.

## Extract

The ACIS statistical extract represents case activity for the latest five-year period. These extracts are typically generated once a year in January and provided on electronic media.

## Criminal/Infraction Records at NCAOC

All criminal data at NCAOC began to be collected in the early 1980s. Since that time, enhancements have been made to include additional data as well as additional code values, so earlier records may not contain all the same field values of more current records. At this time, all criminal case history records are kept in NCAOC's electronic system, while infraction case history records are on a six-year purge cycle. This once-a-month purge includes all cases that meet both of the following criteria: the judgment is satisfied for the case, and the case was disposed more than six years prior to the current end-of-month date.

## CRIMINAL EXTRACT FILE LAYOUT

The following are the record layouts for each record type.
